

Trialbee eConsent: Ease the Patient's Journey into a Clinical Trial

With almost a decade of experience matching and enrolling patients, Trialbee is purpose-built to reduce enrollment risk and efficiently meet global clinical trial timelines. Inspired by the shift from traditional clinical trials to hybrid and decentralized clinical trials, Trialbee has developed a platform driven by data-science to optimize patient matching along with an analytics-driven approach to enrollment, simplifying the patient journey while lowering site-burden. These insights and analytics lead to tangible improvements to patient recruitment as well as enrollment strategies that accelerate clinical trial timelines and unlock operational efficiencies.

Digitize the informed consent process with a flexible eConsent workflow to ease the enrollment process and reduce both site and patient burden. Trialbee's eConsent solution brings transparency to the clinical trial consent process and offers sites and patients the flexibility to consent to a clinical trial from the convenience of their own home while maintaining human connection and providing on-demand support. Our eConsent is fully compliant with 21 CFR Part 11 electronic signature requirements and GDPR requirements.

Ease of use for sponsors, sites and patients

Our eConsent platform allows sites to send documents to participants digitally for pen-and-paper or e-signatures and monitor participants' consent-process status for timely follow-up.

Empowers patients

Approved trial participants can securely access consent forms via smartphone, tablet or computer. Trialbee's intuitive user interface allows users to pause the process and return later, and easily contact the site with questions.

Trialbee eConsent

Streamline enrollment, screening and consent with Trialbee eConsent. Designed to ease the patient's journey into a clinical trial as well as reduce site-burden during enrollment during hybrid and decentralized trials.

- > Ease of use for sponsors, sites and patients
- > Empowers patients
- > Seamlessly integrated into the patient recruitment and enrollment journey

Trialbee eConsent: Ease the Patient's Journey into a Clinical Trial

Seamlessly integrated into the patient recruitment and enrollment journey

Trialbee's web-based digital-consent platform provides the complete package of documents and allows sites to utilize their existing devices (including smartphones, tablets, laptops and desktops) to facilitate the process remotely. 

The screenshot shows the Trialbee eConsent dashboard. At the top, there is a search bar and a navigation menu. Below the search bar, there are several filters and buttons: 'Filter Consent', 'Language', '+ Add Filter', 'Clear filters', 'Import candidates', and 'Add candidate'. A summary bar shows counts for various document statuses: 'No form' (2), 'Pend. signature' (2), 'Signed' (3), 'Completed' (4), 'Withdrawn' (0), 'New message' (0), 'No file' (1), and 'Counter-sign' (2). Below this is a table with columns for 'Candidate name', 'Candidate ID', 'Document status', 'Alerts', and 'Added'. The table lists several candidates with their respective document statuses and dates added.

Candidate name	Candidate ID	Document status	Alerts	Added
Tamar Walsley	GEN103	No form		26 June 2021
Alfred Marsh	GEN233	No form		22 June 2021
Ravi Stanley	GEN125	Signed		21 June 2021
Alice Cohen	GEN192	Completed		14 June 2021
Magnus Sørensen	GEN001	Pend. signature		9 June 2021
Abdulahman Eihal	GEN021	Pend. signature		3 June 2021
Anna Erikson	GEN041	Signed		27 May 2021
Albie McKinney	GEN101	Completed		21 May 2021
Liu Xing	GEN094	Completed		20 May 2021

Trialbee's eConsent solution brings transparency to the clinical trial consent process and offers sites and patients the flexibility to consent to a clinical trial from the convenience of their own home while maintaining human connection and providing on-demand support. ”
