

Trialbee Honey™: The Leading Enrollment Performance Platform

With almost a decade of experience matching and enrolling patients, Trialbee is purpose-built to reduce enrollment risk and efficiently meet global clinical trial timelines. Inspired by the shift from traditional clinical trials to hybrid and decentralized clinical trials, Trialbee has developed a platform driven by data-science to optimize patient matching along with an analytics-driven approach to enrollment, simplifying the patient journey while lowering site-burden. These insights and analytics lead to tangible improvements to patient recruitment as well as enrollment strategies that accelerate clinical trial timelines and unlock operational efficiencies.

Trialbee Honey empowers sites, sponsors, and CROs, giving them the control to drive timely patient recruitment outcomes. Honey was purpose-built to provide transparency into patient qualification and enable convenient communication and engagement between sites and highly qualified patients. Honey manages enrollment of all patients, regardless of the recruitment source, in a single, tailored solution. The robust analytics dashboard allows participants recruited from multiple sources to be consolidated and monitored in one place while unlocking efficiencies by leveraging real-time analytics and full transparency into the funnel.

Trialbee Honey: A Single Purpose-Built Platform to Enroll all your Study Participants

With Honey, you can funnel all your recruited patients into one single platform. Analytics help to determine which recruiting methods and services are most effective, providing full transparency to patient recruitment.

Trialbee Honey

Trialbee Honey is a software platform that offers patients a simple journey into the study, reduces site burden through highly-matched patient referrals, and empowers study teams to successfully manage enrollment performance.

- A single purpose-built platform to enroll all your study participants
- Transparency into patient qualification
- Easy communication facilitating lower site burden

Trialbee Honey: The Leading Enrollment Performance Platform

Easy communication to lower site burden

Virtual tele-health technology and eConsent engages patients and minimizes drop-out rates while providing qualified, study-ready participants and, in turn, reducing site burden.

Transparency into patient qualification

Honey empowers sponsors, CROs, and sites to drive timely patient recruitment outcomes. With Honey you can create efficient solutions for sites to engage highly qualified patients. With one, central measurement and analytics platform, sponsors and CROs gain insight into all their recruitment tactics.

Inspired by the shift from traditional clinical trials to hybrid and decentralized clinical trials, Trialbee has developed a platform driven by data-science to optimize patient matching along with an analytics-driven approach to enrollment, simplifying the patient journey while lowering site-burden. ”
